Sub: Intimation regarding increase in Production capacities of Caustic Soda and Chloromethanes Divisions – Reg.

Ref: Regulation 30 (Schedule III Part-B) of SEBI (LODR) Regulations, 2015.

-0-0-0-

In compliance of Regulation 30 of SEBI (LODR) Regulations 2015, we are happy to inform that the company has received acknowledgement from Ministry of Commerce & Industry for following products production capacity increase in response to our application.

Our plant capacity for Caustic Soda has been increased from 259150 MTs to 332150 MTs per annum. This increase has been achieved by carrying technical improvements like change of latest Zero Gap technology in place of old 3rd and 4th generation elements of the Electrolysers, advanced element coating, adding balancing equipment in brine plant etc.,

Similarly the company has carried certain changes in process parameters and provided additional refrigeration system in Chloromethanes plant. This has resulted in increased production of end product of Methylene Di Chloride / Methylene Chloride from 50000 MT to 69204 MTs.

Kindly take the above submission on record.

\$\$\$\$

The Board in its meeting held on 30.12.2025 has taken note of the decommissioning of 4.89 MW Wind Mill unit at Ramgiri (Anantapur) effective from 31.12.2024 as the cost of running the plant is more than its revenue due to various reasons.

Further, in compliance of Regulation 46 (2) of SEBI (LODR) Regulations, 2015 the information is being hosted on the Company's website www.tgvgroup.com

Kindly take the above on record.

Thanking You

Ref: Our letter No.TGVSL:SECL:BSE:2025-26, dated October 26, 2025.
Scrip Code : 507753

With reference to the subject matter and our letter under reference above, we wish to clarify that our intention was to inform about the breakdown of Transformer. Inadvertently, while reporting, we have mentioned the Transformer's supplier name (Transformers and Rectifiers (India) Limited) (TARIL). The supplier has nothing to do with the breakdown reported as the warranty period has expired long back.

We would like to provide the factual details for the sake of clarity and accurate record.

The subject transformer was supplied to us in August 2015 with an 18-month warranty period. It was commissioned and charged in the same year and has been operating without any issues for nearly 10 years. On the evening of 11th October 2025, we reported a problem with the transformer to the supplier. In response, their engineer promptly visited our site on the morning of 12th October 2025 to assess the situation. As the transformer is now outside its warranty period, the supplier submitted a rectification offer to us on 13th October 2025.

We have initiated necessary action for rectification of the problem by ourselves with the help of other known Agency. We wish to state that the transformer break down is a normal feature of wear and tear. Further, please note that the notification provided to the stock exchanges is strictly intended as a clarification on this matter.

We wish to add that we have long association with TARIL and are happy with their services.

We hope this clears up any confusion and assures all stakeholders.
